SUMMARY

SeniorFlutterDeveloper with 4+ years of experience building scalable, high-performance Android and iOS applications using Flutter. Skilled in Clean Architecture, BLoC, GetX, Provider, Firebase, REST APIs, Dio, Socket.IO, Agora, Stripe, Health Connect, Bluetooth, AI integration, and CI/CD. Successfully delivered 15+ production-ready applications across healthcare, aviation, wellness, e-commerce, education, astrology, and real estate domains. Experienced in leading development teams, collaborating with international clients, and delivering enterprise-grade mobile solutions from concept to deployment.

SKILLS

- Java, Kotlin, Dart, Swift
- BLoC, GetX, Provider, Riverpod
- REST APIs
- Firebase Integration
- Socket.IO, WebSocket
- Agora SDK
- ML Model Integration in Flutter
- Clean Architecture (MVVM / MVC)
- Play Store App Release
- App Store Deployment
- Flutter Flavor Configuration
- Widget Testing
- CI/CD Management
- Git / GitHub / GitLab
- In-App Purchases & Subscriptions

EDUCATION

Bachelor of Science in Information
Technology (B.Sc. IT)
DR. BABASAHEB AMBEDKAR
OPEN UNIVERSITY

LANGUAGES

- English
- Hindi
- Gujarati

WORK EXPERIENCE

Senior Application Specialist (Freelance)

Self-Employed | Feb 2026 – Present

- Developing cross-platform Flutter applications for Android, iOS, and Web for international clients.
- Building scalable applications using Clean Architecture, BLoC, GetX, and Provider.
- Integrating REST APIs, Firebase, Socket.IO, Agora, Stripe, AI/ML, and third-party SDKs.
- Delivering end-to-end solutions from requirement analysis to deployment on the Play Store and App Store.
- Collaborating directly with clients to design scalable, high-quality mobile applications.

Senior Flutter Developer / Team Lead

CodeBuzz Infotech | Oct 2024 – Jan 2026

- Led the development of 8+ enterprise Flutter applications across healthcare, e-commerce, aviation, education, and real estate domains.
- Managed a team of Flutter developers through sprint planning, task allocation, mentoring, and code reviews.
- Designed scalable architectures using BLoC, GetX, Provider, MVVM, and Clean Architecture.
- Integrated REST APIs, Firebase, Socket.IO, Agora, Stripe, Bluetooth, Health Connect, and AI-powered features.
- Optimized application performance, reduced production issues, and managed Play Store and App Store releases.

Flutter Developer

Sahajanand Infotech | Jul 2022 – Sep 2024

- Developed and maintained 6+ Flutter applications for Android and iOS.
- Built responsive user interfaces and integrated REST APIs, Firebase, and third-party SDKs.
- Implemented state management using BLoC and GetX following clean coding practices.
- Fixed production bugs, improved application performance, and collaborated with designers and backend developers.
- Participated in the complete software development lifecycle (SDLC) from development to deployment.

KEY PROJECTS

Target PEAK [🔗](#)

- Built key EdTech workflows including lecture modules, mock/practice tests, quiz flows, result analytics, and live activity tracking.
- Implemented dynamic, admin-driven modules, real-time updates via WebSocket, push notifications, and secure authentication/token-based session handling.
- Designed responsive UI with reusable components and optimized app performance, crash stability, and lifecycle behavior across Android and iOS

WellnessZ: My Coach-Client App [🔗](#)

- Developed a cross-platform Flutter application using Provider and Provider State Management with Clean Architecture.
- Built CRM, meal plans, reminders, client notes, personal feeds, and progress tracking features.
- Developed dynamic, admin-configurable modules and implemented push notifications and secure authentication.
- Designed responsive UI with custom animations and optimized performance for Android and iOS.

Asian Paints Total Assure [🔗](#)

- Maintained and enhanced a cross-platform Flutter application by resolving bugs and improving overall performance.
- Implemented an AI-powered door dent detection and reporting feature.
- Developed leaderboard functionality and improved responsive UI across multiple screen sizes.
- Integrated Secure Storage for safely managing sensitive user data.
- Optimized app performance, smooth animations, and user experience for Android and iOS platforms.

I-MBA The Vibes Academy [🔗](#)

- Developed a cross-platform Flutter application using Clean Architecture and BLoC state management.
- Built smooth, interactive social feed animations to enhance user engagement.
- Integrated REST APIs, authentication, and dynamic content management.
- Designed reusable, responsive UI components with a focus on performance and scalability.

Fatevision User [🔗](#)

- Developed the Fatevision User application using Flutter, GetX, and MVVM Architecture.
- Integrated Dio for REST API communication and Socket.IO/WebSocket for real-time messaging.
- Implemented one-to-one chat, voice calls, and video calls using Agora SDK.
- Integrated Stripe payment gateway for secure online payments.
- Built responsive user interfaces with smooth animations and optimized app performance.
- Collaborated with backend APIs to deliver a seamless user experience.

G9 Jewellery [🔗](#)

- Developed a cross-platform Flutter application for Android and iOS using GetX and MVC Architecture.
- Built core e-commerce features including product browsing, category management, product search, shopping cart, wishlist, and secure checkout.
- Implemented jewellery ring previews, reels/short video features, and an intuitive product viewing experience.
- Integrated REST APIs for product catalog, user authentication, orders, and payment processing.
- Created responsive UI with smooth animations and optimized application performance.

Period Calendar: Olivia [🔗](#)

- Developed a cross-platform Flutter application using BLoC architecture for scalable and maintainable state management.
- Integrated REST APIs for period tracking, ovulation prediction, fertility insights, pregnancy planning, and user data synchronization.
- Implemented menstrual cycle tracking, ovulation prediction, fertility window calculation, symptom and mood logging, and pregnancy planning features.
- Built responsive, user-friendly UI with custom animations to enhance the user experience.
- Developed secure authentication and local data storage to protect user privacy.

TAFHighlight [🔗](#)

- Developed and maintained a cross-platform Flutter application using GetX and MVC Architecture.
- Integrated WebView to seamlessly embed the aviation web platform within the mobile application.
- Established secure communication between Flutter and JavaScript for seamless WebView interactions and data exchange.
- Designed responsive UI with smooth custom animations and optimized application performance.
